Two-year MA in
ECONOMICS, FINANCE & INTERNATIONAL INTEGRATION
**Overview**

The Master degree in Economics, Finance and International Integration (MEFI) aims to train professionals with a high capacity of analyzing complex economic systems, in the context of markets globalization, financial activities innovation and firms’ strategic behavior. It includes different courses covering topics related to applied economics, theoretical and applied finance, mathematics, statistics, business administration, law and other complementary courses. The program is structured in three different curricula: Finance, Industrial Organization and Market Regulation, International Economic Integration and Development. Graduates will learn to understand financial asset pricing and to develop models for forecasting returns, linking them to the underlying economic trend. They will also be able to analyze issues concerning industrial organization and market regulation and will acquire expertise in tackling international issues of integration and development by applying theoretical models and techniques appropriate to the analysis of the interdependence between economic, social and political forces. The program is taught in English.
