On behalf of our client, a fully funded Internet Startup in Berlin, we are currently accepting resumes for the following professional opportunity:

PS1184B SENIOR DATA SCIENTIST (BERLIN)

To manage and capitalize on the constant stream of big data, the company is looking for a data scientist to analyse and create complex algorithms based on the company's data sources.

YOUR RESPONSIBILITIES
- Analyse raw data – assessing quality, cleansing, structuring for downstream processing
- Design prototypes for accurate and scalable prediction processes and algorithms
- Create functional and technical documentation
- Collaborate with the software development team for implementation
- Oversee product systems – monitor accuracy and performance and resolve issues
- Communicate the results to partners and customers

YOUR PROFILE
- At least 3+ years of professional experience
- Successfully completed studies in Statistics / Applied Mathematics / Computer Science or related field,   or equivalent professional experience
- Creative & pragmatic analytical approach with a passion for understanding the user base
- Ability to quickly identify issues and their causes, and effectively solve them
- Very solid data analysis skills including application of analytical techniques such as graphical analysis,   mathematical modeling and hypothesis testing
- Familiar with SQL, NoSQL and programming techniques to manipulate data
- Advanced coding skills to build small scripts and applications to support analytical work and develop prototypes
- Excellent verbal and written communication skills, with the ability to communicate technical topics   to non-technical professionals in English

OUR OFFER
- High level of responsibility from day one
- Help develop a product that will change mobile marketing
- Closely work with development team members
- Annual salary not disclosed, but company shares are an option
- Full time and long term contract
