

DESIGN AND DEVELOPMENT OF VEHICLE DYNAMICS ENGINEERING

THE FIRST EDITION OF THE MASTER IN DESIGN AND DEVELOPMENT OF VEHICLE DYNAMICS ENGINEERING – D2VDE

zampociviere

WITH **QUATTRRUOTE** YOUR FUTURE IS ON THE RIGHT TRACK

Università di Pavia (www.unipv.eu), in collaboration with **Quattroruote Academy**, presents the Master in **Design and Development of Vehicle Dynamics Engineering-D2VDE**, an initiative with a high technical content and an international outlook for twenty-four engineers who want to work in the field of vehicle dynamics engineering: from simulation to testing prototypes and constructing the preproduction vehicle. Students will be able to gain special operative competence on testing techniques during the twenty-two days on the Quattroruote test track. For the whole duration of the Master's course, a static simulator for the development of the vehicles will be at the disposal of the students. The course, located in one of the most prestigious Italian universities, will last 1,500 hours and includes a period of internships at the leading automotive companies in Italy and in Europe.
